

THARIDU E

BSc(Hons) Computer Science, First Class Honours, University of Westminster | React | Software Engineer
London, UK | 07411 795042 | deshanekanayake2003@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Computer Science graduate with First Class Honours specialising in full-stack development and ML integration. Rebuilt a production-grade clinical prioritisation system overhauling authentication, CI/CD, and a normalised multi-table schema achieving 94% Random Forest accuracy across a 662-patient dataset. Delivered 15+ responsive UI components in a 12-week live client sprint and cut API calls by 70% via debounced search. Seeking a graduate or junior software engineering role to build reliable, well-tested systems.

SKILLS

Functional Competencies: Full-Stack Development | REST API Design | Machine Learning | RAG Pipelines | Agile/Scrum | Component-Based Architecture | Responsive UI Design | CI/CD | SDLC | Cross-Functional Collaboration

Technical Tools: TypeScript | JavaScript | Python | Java | SQL | React | Node.js | Express.js | Spring Boot | FastAPI | Django | TailwindCSS | scikit-learn | PostgreSQL | MySQL | Docker | GitHub Actions | Git | Zod | Vite

PROJECTS

- Diacify – Clinical Decision Support System** [Link](#) Sep 2025 – Apr 2026
React 18, Vite, Node.js, Express.js, MySQL 8, FastAPI, scikit-learn, Docker, GitHub Actions
- Rebuilt a final-year clinical prioritisation system from scratch, resolving 6 examiner-identified security and architecture failures across authentication, data modelling, and ML label validity.
 - Architected a decoupled three-service system: React/Vite frontend with cryptographic Clerk session-token auth, a Node.js/Express REST API with Zod validation and helmet.js headers, and a Python/FastAPI microservice serving a Random Forest classifier behind an internal shared-secret header.
 - Trained the Random Forest on 662 patients across 13 clinical indicators using ADA 2025 thresholds; accuracy improved from 89% to 94% via GridSearchCV; implemented 3 GitHub Actions workflows, 8 Jest integration tests, and 4 pytest tests with a normalised schema across patients, visits, appointments, and audit_log.
- Agile Group Web Application – SKY Engineering Health Check** [Link](#) Jan 2025 – Mar 2025
Django 5, Python, Bootstrap 5, JavaScript, SQLite
- Delivered a full-stack Django 5 application to a live B2B client in a 5-person agile team across a 12-week sprint, implementing the Spotify Squad Health Check model with role-specific dashboards for 4 user tiers.
 - Authored 20 Django TestCase tests covering authentication, voting workflows, and role-based routing; enforced unique-per-(user, session, card) constraints via Django ORM to prevent duplicate submissions.
- Project Management Tool – Yurjinia** [Link](#) 2025
React 19, TypeScript, TailwindCSS v4, TanStack Router/Query, Zustand, Clerk
- Built a Jira-style project management SPA solo with Kanban board, per-project ticket management, and a reusable component library using shadcn/ui and Radix UI with TanStack Query for server state.
 - Implemented schema-validated forms using Zod and React Hook Form; structured the app with TanStack Router for type-safe routing and Zustand for client state management.

EXPERIENCE

- Owlypia** June 2025
Digital Marketing Intern Remote, London, UK
- Developed a cross-platform content strategy for an EdTech platform operating across 40+ countries; built a 4-week X/Twitter content calendar of 16 posts and 12 graphic briefs, a full LinkedIn strategy covering 3-audience targeting, and an Instagram student spotlight series with a WhatsApp-based submission workflow.

EDUCATION

- University of Westminster** Sept 2023 – July 2026
BSc (Hons) Computer Science, First Class Honours
- Core modules: OOP, Algorithms, Client-Server Architectures, Cybersecurity, AI. Final Year Project: ML-integrated clinical decision support system.

AWARDS AND RECOGNITIONS

Westminster Award Bronze, University of Westminster, April 2026

COURSES AND CERTIFICATIONS

Work Based Learning Certificate, University of Westminster | Front-End Development, Meta, Jan 2024 | Responsive Web Design, freeCodeCamp, Apr 2024 | SQL (Basic), HackerRank, Jul 2024
