

THARIDU E

BSc(Hons) Computer Science, University of Westminster | React | Software Engineer
London, UK | 07411 795042 | [Gmail](#) | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Computer Science undergraduate specialising in full-stack development and ML integration. Rebuilt a production-grade clinical prioritisation system achieving 94% Random Forest accuracy across a 662-patient dataset; delivered 15+ UI components in a 12-week live client sprint; cut API calls by 70% via debounced search. Westminster Award Bronze, April 2026.

SKILLS

Functional: Full-Stack Development | REST API Design | Machine Learning | Agile/Scrum | Component-Based Architecture | Data Preprocessing | Client-Facing Communication

Technical: TypeScript | JavaScript | Python | SQL | Java | React | Node.js | Express.js | Spring Boot | FastAPI | Django | scikit-learn | PostgreSQL | MySQL | Docker | GitHub Actions

PROJECTS

Diacify – Clinical Decision Support System [Link](#) *Sep 2025 – Apr 2026*
React 18, Node.js, Express.js, MySQL 8, FastAPI, scikit-learn, Docker, GitHub Actions

- Rebuilt a final-year clinical prioritisation system from scratch, resolving 6 examiner-identified failures across authentication, data modelling, and ML label validity.
- Architected a decoupled three-service system with Clerk session-token authentication, Zod validation, helmet.js security headers, and a Random Forest microservice protected by an internal shared-secret header.
- Trained Random Forest on 662 patients across 13 clinical indicators; accuracy improved 89% to 94% via GridSearchCV. Three GitHub Actions CI/CD workflows, 8 Jest and 4 pytest tests.

Agile Group Web Application [Link](#) *Jan 2025 – Mar 2025*
Django 5, Python, Bootstrap 5, JavaScript, SQLite

- Delivered a full-stack Django 5 app to a SKY Engineering client in a 5-person agile team over 12 weeks, implementing Spotify Squad Health Check across 10 cards with role-specific dashboards for 4 user tiers.
- Designed role-based access control with traffic-light voting and trend tracking; authored 20 Django TestCase tests achieving full end-to-end coverage across all tiers.

Java REST API with React Frontend [Link](#) *2025*
Java 17, Spring Boot 3.2, PostgreSQL, JUnit 5, React 18, TypeScript

- Built a Spring Boot 3.2 REST API with 8 CRUD endpoints; typed exception hierarchy, DTO contracts, JUnit 5/Mockito tests, and auto-generated Swagger UI via SpringDoc OpenAPI.

EXPERIENCE

Owlypia *June 2026*
Digital Marketing Intern *Remote, London, UK*

- Developed cross-platform strategy for an EdTech platform across 40+ countries; built a 4-week X/Twitter content calendar (16 posts, 12 graphic briefs) and produced a full LinkedIn strategy document covering 3-audience targeting.

EDUCATION

University of Westminster *Sept 2023 – July 2026*
BSc (Hons) Computer Science

- Final Year Project: ML-integrated clinical decision support system applying full-stack development and machine learning.
- Core modules: Object-Oriented Programming, Algorithms, Client-Server Architectures, Cybersecurity, AI.

AWARDS AND RECOGNITIONS

Westminster Award Bronze, University of Westminster, April 2026

COURSES AND CERTIFICATIONS

Work Based Learning Certificate, University of Westminster | Front-End Development, Meta (Jan 2024) | Responsive Web Design, freeCodeCamp (Apr 2024) | SQL (Basic), HackerRank (Jul 2024)
