SUMMARY

Computer Science graduate with First Class Honours specialising in full-stack development and applied machine learning. Rebuilt a production-grade clinical prioritisation system with cryptographically verified authentication, a normalised multi-table schema, and three CI/CD pipelines, achieving 94% Random Forest accuracy on a 662-patient dataset. Delivered a live B2B client application in a 5-person agile team and currently building server-side AI systems (RAG, agent workflows, evaluation harnesses) as a Backend AI Engineering Intern at FlyRank.

SKILLS

Functional Competencies: Full-Stack Development | REST API Design | Machine Learning | RAG and Retrieval Pipelines | Agent Workflows | CI/CD | Agile/Scrum | Component-Based Architecture | Responsive UI Design | Data Preprocessing | Client-Facing Communication

Technical Tools: TypeScript | JavaScript | Python | Java | SQL | React | Node.js | Express.js | Spring Boot | FastAPI | Django | scikit-learn | pandas | PostgreSQL | MySQL | Supabase | Docker | GitHub Actions | Git | Zod | TailwindCSS

AI Workflow: Claude (coding, debugging, architecture) | GitHub Copilot (code completion) | CodeRabbit (PR reviews) | Perplexity (research) | Lovable (rapid prototyping)

PROJECTS

- Diacyfy – Clinical Decision Support System** [Link](#) Sep 2025 – Apr 2026
React 18, Node.js, Express.js, MySQL 8, FastAPI, scikit-learn, Docker, GitHub Actions
- Rebuilt a final-year clinical prioritisation system from scratch, resolving 6 examiner-identified security and architecture failures across authentication, data modelling, and ML label validity.
 - Architected a decoupled three-service system: React frontend with Clerk session tokens verified cryptographically on every backend route, a Node.js/Express REST API with Zod validation and helmet.js, and a Python/FastAPI ML microservice protected by an internal shared-secret header.
 - Trained a Random Forest on 662 patients across 13 clinical indicators using ADA 2025 thresholds and a five-flag composite labelling rule grounded in published literature; improved accuracy from 89% to 94% via GridSearchCV.
 - Implemented 3 GitHub Actions CI/CD workflows with path filters and a MySQL 8 service container, 8 Jest integration tests, and 4 pytest tests; normalised a flat schema into patients, visits, appointments, and audit_log tables.
- Agile Group Web Application – SKY Engineering Health Check** [Link](#) Jan 2025 – Mar 2025
Django 5, Python, Bootstrap 5, JavaScript, SQLite
- Delivered a full-stack Django 5 application to a live SKY Engineering client in a 5-person agile team over a 12-week sprint, implementing the Spotify Squad Health Check model with role-specific dashboards for 4 user tiers.
 - Authored 20 Django TestCase tests covering authentication, voting workflows, role-based routing, and profile management, achieving full end-to-end feature coverage.
- Java REST API – Westminster Health Centre** [Link](#) 2025
Java 17, Spring Boot 3.2, Spring Data JPA, PostgreSQL, JUnit 5, React 18, TypeScript
- Built a Spring Boot 3.2 REST API with 8 CRUD endpoints, a typed exception hierarchy mapped to HTTP status codes, JUnit 5 unit tests with Mockito, and MockMvc integration tests, paired with a React 18 TypeScript frontend.

EXPERIENCE

- FlyRank** July 2026
Backend AI Engineering Intern Remote
- Building reliable server-side AI systems covering API contract design, retrieval-augmented generation (RAG), structured-output pipelines, tool-calling and agent workflows, and evaluation harnesses with failure-mode analysis.
 - Developing a capstone backend artefact using FastAPI/Express, Anthropic/OpenAI models, Supabase/PostgreSQL, and Zod, with a lightweight eval rubric comparing outputs against defined quality criteria.
- Owlypia** June 2025
Digital Marketing Intern Remote, London, UK
- Developed a cross-platform digital marketing strategy for an international EdTech platform operating in 40+ countries; built a 4-week X/Twitter content calendar spanning 4 pillars, 16 posts, and 12 graphic briefs, plus a full LinkedIn strategy document with 3-audience targeting.

EDUCATION

- University of Westminster** Sept 2023 – July 2026
BSc (Hons) Computer Science, First Class Honours London, UK
- Core modules: Object-Oriented Programming, Algorithms, Client-Server Architectures, Cybersecurity, AI. Westminster Award Bronze, April 2026.

COURSES AND CERTIFICATIONS

HackerRank Orchestrate – AI Agent Building and Deployment, June 2026 (Ranked #234 / 1,773)
Work Based Learning Certificate, University of Westminster | Front-End Development, Meta, January 2024
Responsive Web Design, freeCodeCamp, April 2024 | SQL (Basic), HackerRank, July 2024
